LaHabra® Exterior Color Coat Patch

Architectural Specification Guide

Description

LaHabra Exterior Color Coat Patch is a premixed colored stucco finish coat that only requires the addition of water. Use: LaHabra® Exterior Color Coat Patch is used for small repairs to LaHabra® stucco surfaces when a premixed color is needed. A variety of textures and finishes can be achieved over a portland cement plaster brown coat.

Composition

LaHabra Exterior Color Coat Patch is a mechanically blended compound of portland cement, hydrated lime, aggregates and proprietary ingredients.

Packaging

Product is available in two-pound boxes, packed 24 per case.

Storage

LaHabra® Exterior Color Coat Patch should be stored under cool, dry conditions. Avoid direct contact with the ground. Properly stored LaHabra® Color Patch has a useable lifetime of approximately six (6) months from date of manufacture.

Coverage

Approximate coverage per two pound box, when applied according to manufacturer's recommendations, is 2 sq. ft. to 3 sq. ft., depending on finish texture and type.

Job Procedure

One box of LaHabra Exterior Color Coat Patch should be mixed with approximately 10 to 11 fluid ounces of water. Apply to a maximum of 1/8" over a portland cement base coat. Do not apply to a painted or sealed surface.

Just add water.

Material Standard

- A. Hydrated Lime: ASTM C-206 and ASTM C-207
- B. White Portland Cement: ASTM C-150 Type 1 Federal Specification SS-C-1960/3 Type 1

Cautions and Limitations

- A. See package for handling precautions.
- B. Always wear proper safety equipment, including particle mask, when mixing and/or applying this product.
